Nuclear Engineering and Design 178 (1997) 343

Nuclear Engineering and Design

Subject Index of Volume 178

Mechanical design, component fabrication and testing

Displacement estimates of pipe elbows prior to plastic callapse loads 178 (1997) 165
A model for plastic hinges in tubular beams impact 178 (1997) 179
Modified solution of radial nozzle with thick reinforcement in spherical vessel head subjected to radial load 178 (1997) 185
Integrity of the blowdown piping systems in a nuclear power plane—findings and consequences 178 (1997) 195
Structural evaluation of thermal stratification for PWR surge line 178 (1997) 211
OFF-LINE system for determination of the residual life of vessels by experts 178 (1997) 221

Materials engineering

Artificial neural networks in prediction of mechanical behavior of concrete at high temperature 178 (1997) 1

Fuel engineering

Defuelling of the UTR-300 research reactor 178 (1997) 98
Highly enriched uranium recycle and conversion facility at COGEMA Pierrelatte 178 (1997) 107
Thermal compatibility of centrifugally atomized U–Mo powders with aluminium in a dispersion fuel 178 (1997) 111
Development of very-high-density low-enriched-uranium fuels 178 (1997) 119

Reactor engineering

FRM-II: The new German research reactor 178 (1997) 127
Techniques for CAD reconstruction of 'as-built' environments and application to preparing for dismantling of plants 178 (1997) 135
Local damage assessment of turbine missile impact on composite and multiple barriers 178 (1997) 145

Miscellaneous

Announcement 178 (1997) 157
Preface 178 (1997) 163

Thermal hydraulics, safety, and risk analysis

Simulation and analysis of transient cooldown natural convection experiments 178 (1997) 13
Heat transfer modeling in the vertical tubes of the passive containment cooling system of the simplified boiling water reactor 178 (1997) 29
AHMED experiment on hygroscopic and inert aerosol behaviour in LWR containment conditions: experimental results 178 (1997) 45
Annular flow entrainment rate experiment in a small vertical pipe 178 (1997) 61
Implementation and assessment of improved models and options in TRAC-BF1 178 (1997) 71
The investigation of turbulence characteristics in an internally-heated unstably-stratified fluid layer 178 (1997) 235
Viscosities of corium–concrete mixtures 178 (1997) 259
Corium viscosity modelling above liquidus temperature 178 (1997) 269
Non-linear dynamics of a two phase flow system in an evaporator: The effects of (i) a time varying pressure drop (ii) an axially varying heat flux 178 (1997) 279
Quantitative prediction of natural circulation in an LMFR with a similarity law and a water test 178 (1997) 295
Approximate functions for the fast computation of the thermodynamic properties of heavy water 178 (1997) 309
An independent assessment of Groeneveld et al.'s 1995 CHF look-up table 178 (1997) 331

PII S0029-5493(97)00325-7
